TECHNICAL PROJECTS

Online Computer parts Management System

This is a **Java-based** web application designed to streamline the management of computer parts for both customers and sellers. The system provides a user-friendly platform for administrators to manage accounts, sellers to showcase products, and customers to browse and purchase computer parts seamlessly. [GitHub](#)

Virtual dressing mall

VirtualDressingMall is **a MERN stack-based** web app that lets users browse dresses from various shops and buy them online with secure payments. Developed for my university's IT Project module, it enhances the shopping experience with a user-friendly interface. Future plans include AR try-ons and AI-powered recommendations. [GitHub](#)

Personal Portfolio Website

Built a modern portfolio website using **HTML**, **CSS**, **JavaScript** to showcase projects, skills, and experience. Designed a clean, responsive UI with smooth navigation and animations. Integrated a project gallery, downloadable resume, and contact section. Deployed on **GitHub pages** for fast performance and accessibility. [Portfolio](#)

Wildlife Safari Management System

The Wildlife Safari Management System is a comprehensive project designed to streamline the operations of a safari booking and management platform. This system allows users to make reservations, manage bookings, and provides admin functionality to oversee and manage safari activities efficiently. [GitHub](#)

Finance Tracking App

Finance Tracker is a comprehensive Android mobile application designed to help you gain control over your financial life. This elegant, powerful, and user-friendly app allows you to track expenses, monitor income, set budgets, and analyze your spending habits – all in one place. With its intuitive interface and robust features, Finance Tracker is the perfect companion for individuals looking to improve their financial health and discipline. [GitHub](#)
